Topic 6

Learning Objectives

1. How do consumer characteristics influence buying behavior?
2. What major psychological processes influence consumer responses to the marketing program?
3. How do consumers make purchasing decisions?

Consumer behavior

- The study of how individuals, groups, and organizations select, buy, use, and dispose of goods, services, ideas, or experiences to satisfy their needs and wants
- Influenced by **cultural**, **social**, and **personal** factors

What Influences Consumer Behavior?

- **Cultural factors**
 - Culture
 - Subcultures
 - Social classes

Social Factors

Reference groups

Cliques

Family

Roles and status

- **Membership groups**
 - **Primary vs. secondary**
- **Aspirational groups**
- **Dissociative groups**
- **Opinion leader**

Reference Groups

A person who offers informal advice or information about a specific product or product category, such as which of several brands is best or how a particular product may be used.

Family

- **Family of orientation**

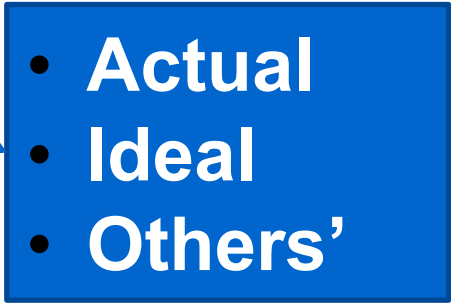

- **Family of procreation**

- Age/stage in life cycle
- Occupation and economic circumstances
- Personality and **self-concept**
- Lifestyle and values

Personal Factors

- 
- Actual
 - Ideal
 - Others'

Family life-cycle stages

Young	Middle-aged	Older
Single Married without children Married with children (infant, young, adolescent children) Divorced with children	Single Married without children Married with children (young, adolescent children) Married without dependent children Divorced without children Divorced with children (young, adolescent children) Divorced without dependent children	Older married Older unmarried

Consumer Trends 2026

(Euromonitor International 2025)

- 1 Comfort Zone
- 2 Fiercely unfiltered
- 3 Rewired Wellness
- 4 Next Asian Wave

Consumer Trends 2026:

(Euromonitor International, 2025)

Comfort Zone

„They're looking for comfort, calm and mental refuge to protect their peace in a contentious world.”

„People are reevaluating how they spend their time, money and energy. And two thirds of consumers look for ways to simplify their lives.”

58% of consumers experience moderate to extreme stress on a daily basis. **2 in 5** consumers feel under constant pressure to get things done.

Consumer Trends 2026:

(Euromonitor International, 2025)

Comfort Zone

„People accept the limits of their personal impact on the environment. The percentage of consumers who feel like they can make a difference to the world through their choices and actions fell to 51% in 2025, compared with 56% in 2024.”

51% of consumers feel they can make a difference to the world through their choices and actions, down from 56% in 2024.

Comfort Zone

Tactics for 2026:

- 1 Develop products and services that offer comfort, boost confidence, simplify life or promote balance to help consumers find serenity in uncertainty.**
- 2 Focus on ease of use in product designs and customer experiences to remove unnecessary complexities.**
- 3 Offer practical solutions to enhance wellbeing and provide a greater sense of control. Use AI or tech integrations in such applications but with a clear purpose**

Comfort Zone: Trend applications

Source: LG

LG

LG introduced a new cooling system that uses AI to deliver personalised climate control and energy efficiency. ARTCOOL AI Air features adaptable airflow settings and adjusts based on usage patterns for optimal temperature regulation.

Consumer Trends 2026:

(Euromonitor International, 2025)

Rewired wellness

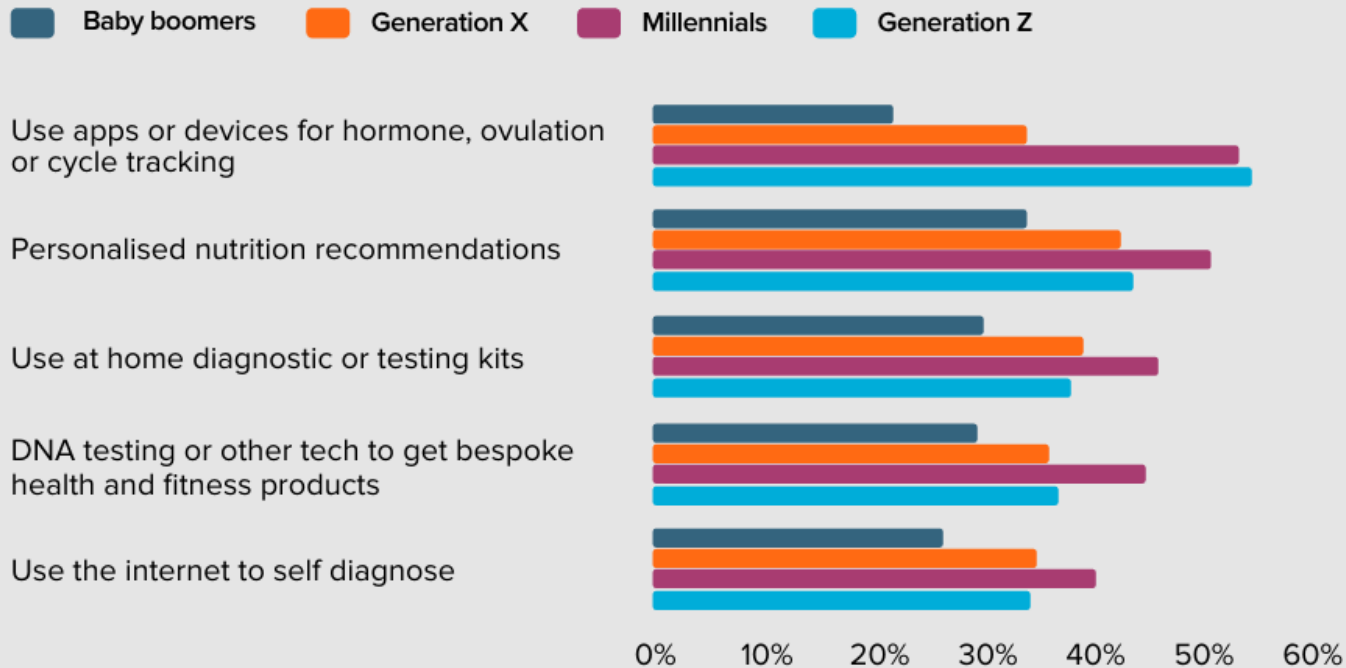

„Consumers want clinical-level, high tech solutions as everyday wellness tools. Traditional routines are traded in for advanced therapies and precision products. Advanced self-care options should be easily accessible and deliver quick results combined with long-term benefits.”

62% of professionals said wellness trends and the focus on self-care will highly influence their industry over the next five years.

Perceptions of digital health technologies

% of consumers who selected extremely or very comfortable with the following technologies

Source: Euromonitor International, Voice of the Consumer: Health and Nutrition Survey, fielded February 2025 (n=21,207)

²Euromonitor International, Voice of the Consumer: Health and Nutrition Survey, fielded February 2025 (n=21,207)

²⁶Euromonitor International, Voice of the Consumer: Health and Nutrition Survey, fielded February 2025 (n=3,682)

²⁷Euromonitor International, Voice of the Consumer: Health and Nutrition Survey, fielded February 2025 (n=5,897; n=6,284)

Tactics for 2026: **Rewired wellness**

- 1 Form strategic tech and medical partnerships to gain clinical knowledge, elevate credibility and guide responsible development of products or services.**
- 2 Innovate beyond generic health claims with bio-personalised, tech-driven solutions and professional-grade precision that can be achieved at home or on the go.**
- 3 Use data-driven and science-led storytelling to showcase tangible health outcomes and educate consumers on short- and long-term benefits.**

Rewired Wellness: Trend applications

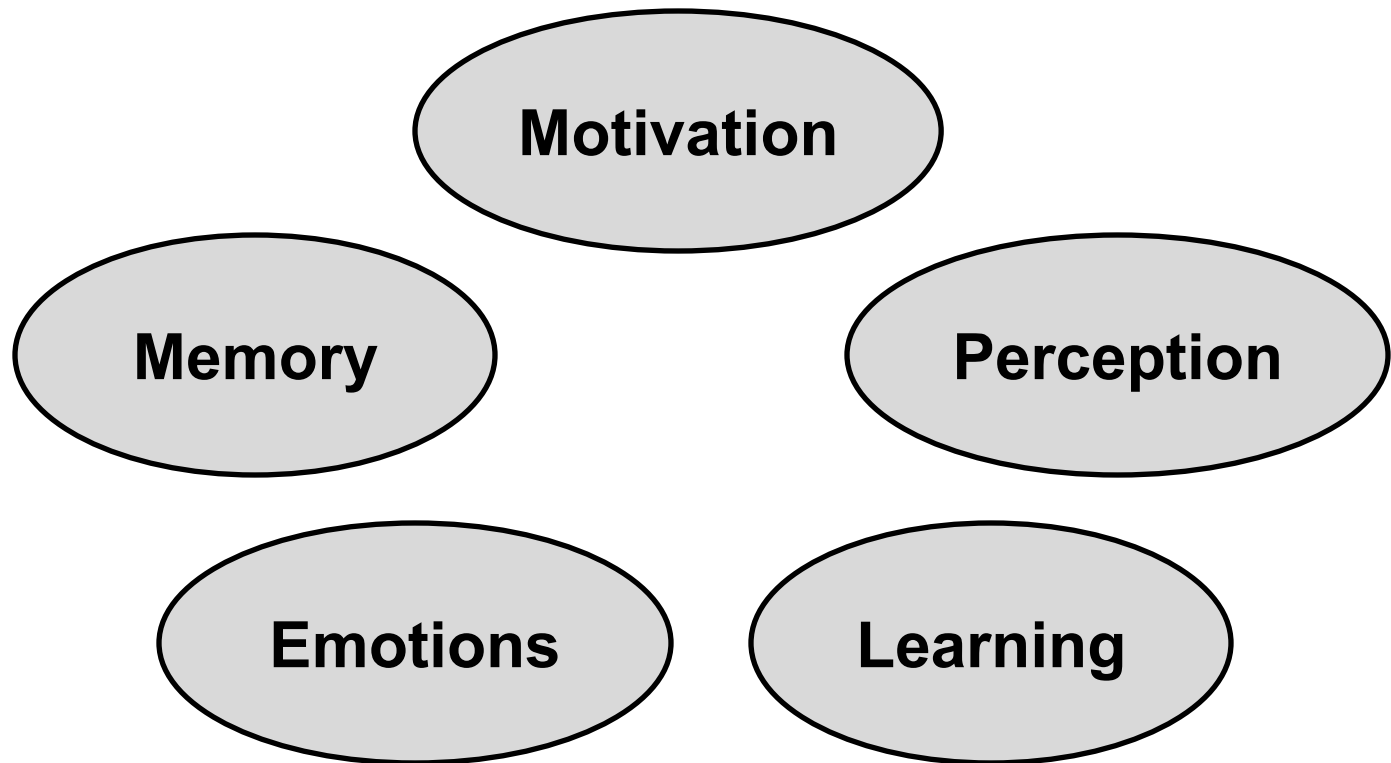

Nestlé

Nestlé created a proprietary protein technology geared towards consumers who are focused on weight management like GLP-1 users. The company's Boost brand launched a pre-meal nutritional shot, formulated with their patented whey protein microgels, to support appetite control.

Key Psychological Processes

Motivation

A need becomes a motive when it is aroused to a sufficient level of intensity to drive us to act

Freud's Theory

Behavior is guided by subconscious motivations

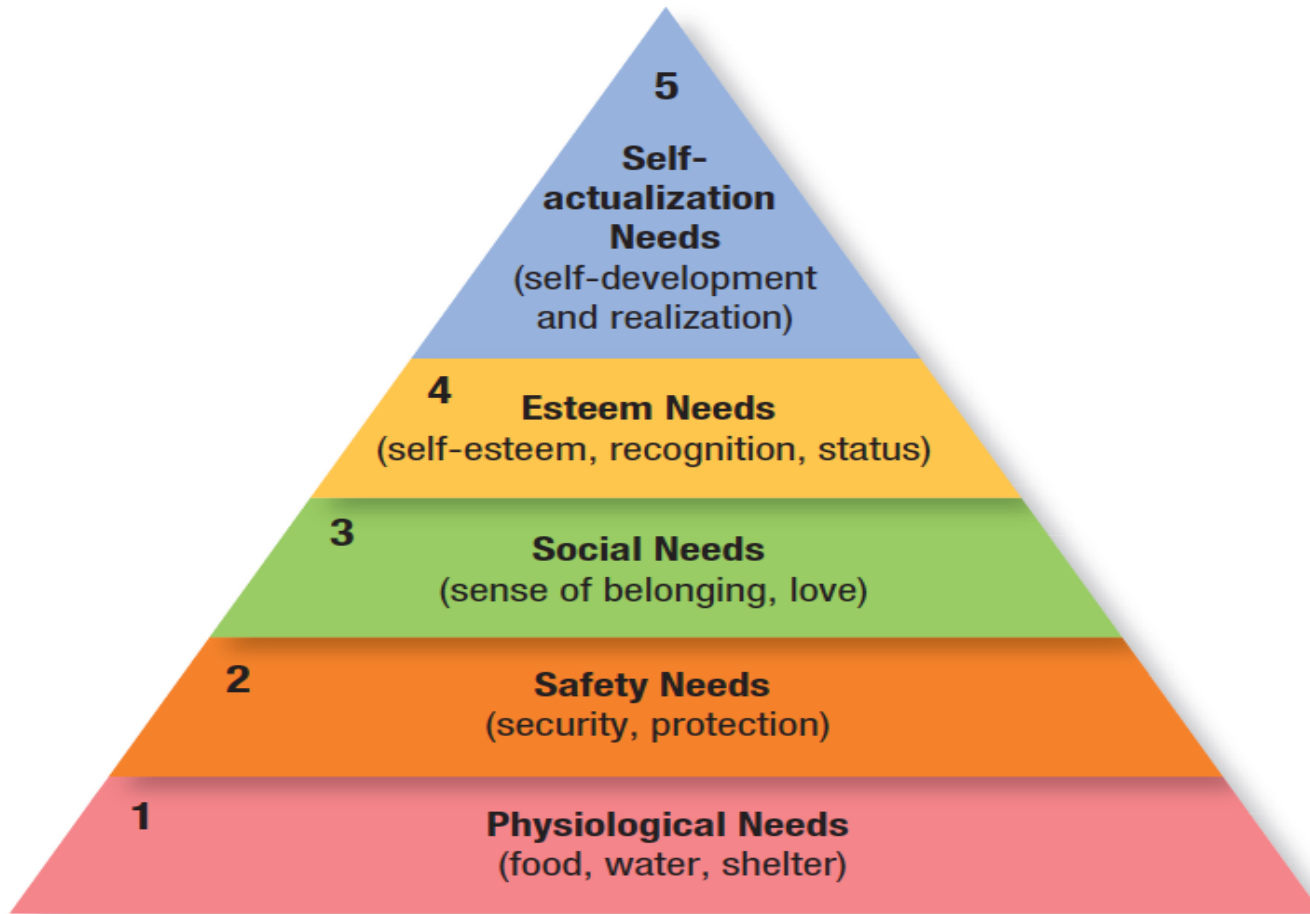

Maslow's Hierarchy of Needs

Behavior is driven by lowest, unmet need

Herzberg's Two-Factor Theory

Behavior is guided by dissatisfiers and satisfiers

Maslow's Hierarchy of Needs

The process by which we select, organize, and interpret information inputs to create a meaningful picture of the world

Perception

Selective attention

is the tendency for people to screen out most of the information to which they are exposed

Selective distortion

is the tendency for people to interpret information in a way that will support what they already believe

Selective retention

is the tendency to remember good points made about a brand they favor and forget good points made about competing brands

Subliminal perception

messages consumers are not consciously aware of

Other Key Psychological Processes

Learning

Induces changes in our behavior arising from experience

Emotions

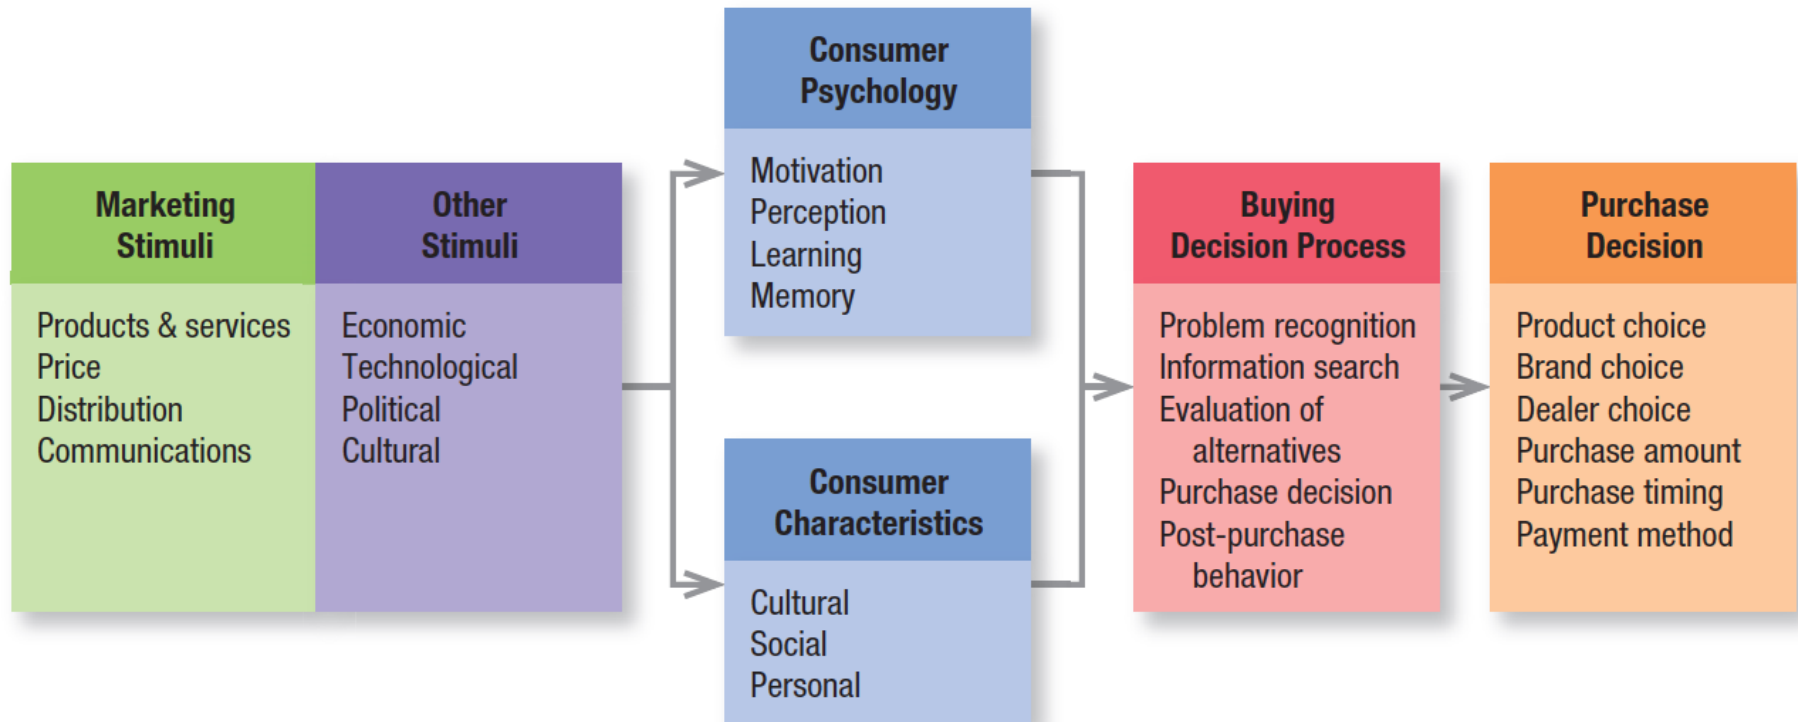

Many different kinds of emotions can be linked to brands

Memory

Short-term vs. long-term memory
Associative network memory model
Brand associations
Memory encoding
Memory retrieval

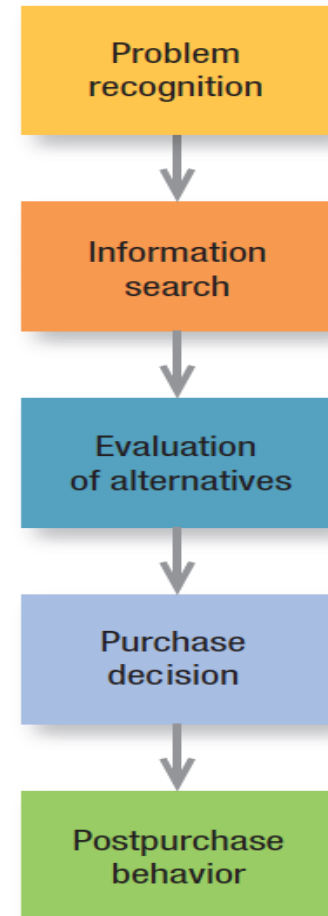

Model Of Consumer Behavior

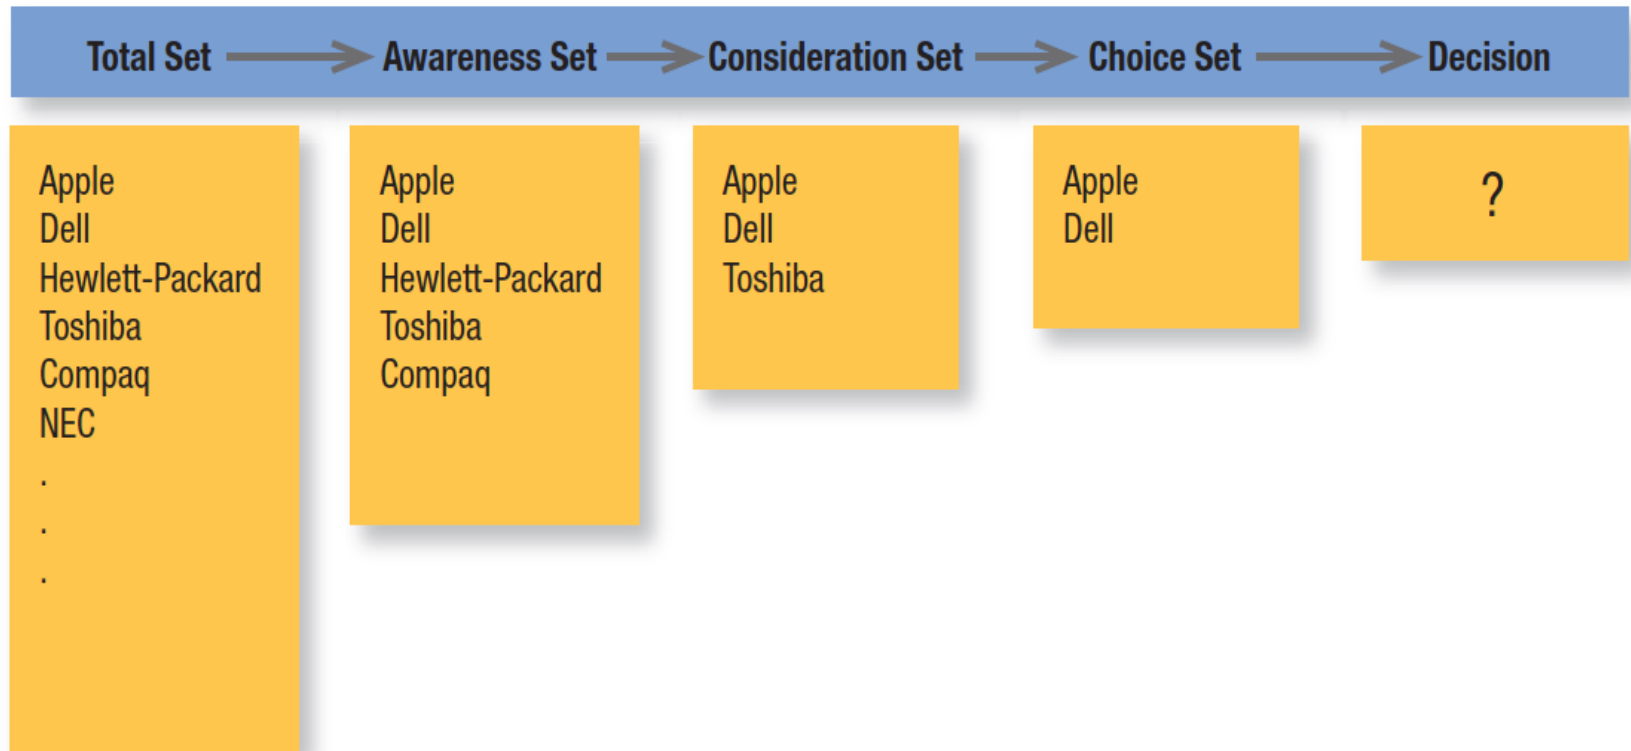

The Buying Decision Process

The consumer typically passes through five stages

- **Problem recognition**
- **Information search**
- **Evaluation of alternatives**
- **Purchase decision**
- **Postpurchase behavior**

Sets Involved In Decision Making

Car

Brand

Price

Type

...

...

**Hierarchy of
Attributes**

Evaluation of alternatives

- Expectancy-value model

The Buying Decision Process

TABLE 6.3

A Consumer's Brand Beliefs about Laptop Computers

Laptop Computer	Attribute			
	Memory Capacity	Graphics Capability	Size and Weight	Price
A	8	9	6	9
B	7	7	7	7
C	10	4	3	2
D	5	3	8	5

Evaluation of alternatives

- Expectancy-value model

The Buying Decision Process

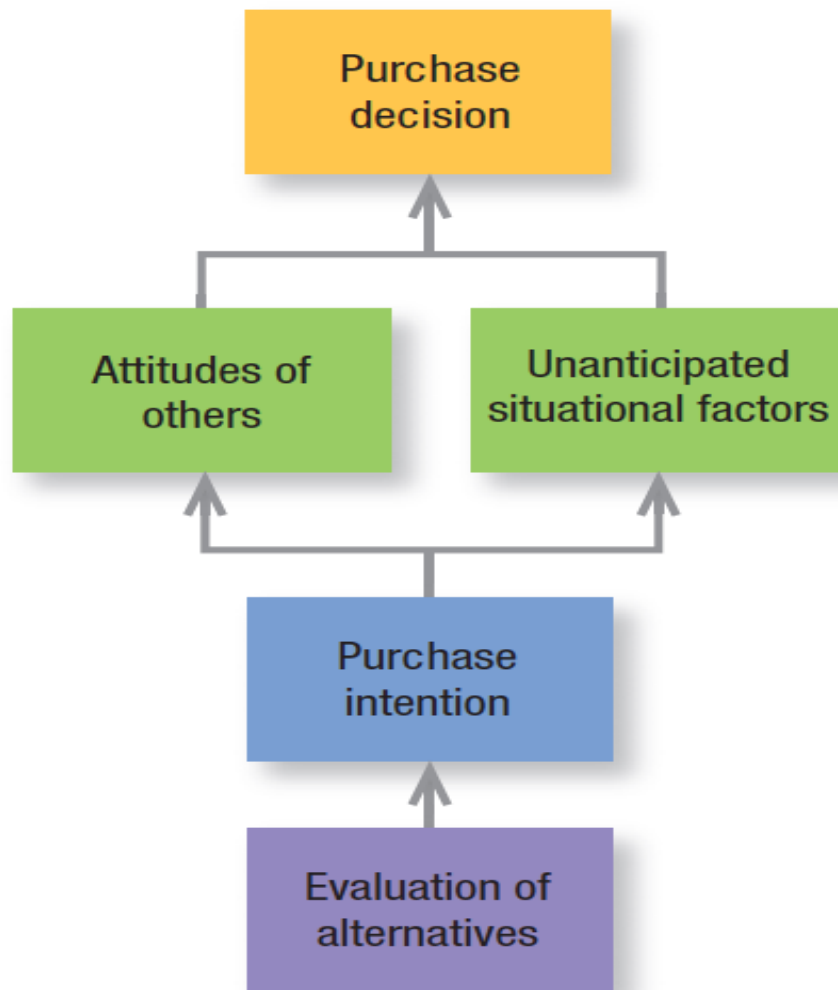

TABLE 6.3 A Consumer's Brand Beliefs about Laptop Computers				
Laptop Computer	Attribute			
	40% Memory Capacity	30% Graphics Capability	20% Size and Weight	10% Price
A	8	9	6	9
B	7	7	7	7
C	10	4	3	2
D	5	3	8	5
